

FATIGUE MANAGEMENT in Transportation Operations

2009 International Conference • Boston, USA March 24 - 26

2009 International Conference on Fatigue Management in Transportation Operations: A Framework for Progress

Date 2009 March 24-26

Organizer US Department of Transportation, Human Factors Coordinating Committee,
Operator Fatigue Management Program: <http://hfcc.dot.gov/ofm/>
Stephen Popkin, HFCC Executive Agent & Director of Human Factors, Volpe Center
Michael Coplen, HFCC Chair & Senior Evaluator, Office of Railroad Development, FRA

Location Boston Marriott Long Wharf, Boston, Massachusetts

Website **ONLINE REGISTRATION NOW OPEN!** <http://www.fatiguemanagement09.org/>

This conference, hosted by the U.S. Department of Transportation's Human Factors Coordinating Committee under its Operator Fatigue Management Program, is a continuation of the Fatigue in Transportation conference series that last took place in Seattle, Washington in 2005. The objectives of the conference are twofold: 1) disseminate information on the latest fatigue-related research, technology, and countermeasures, and 2) facilitate the use of this information, and evaluation methods needed, for achieving better fatigue management in transportation. The program encompasses sessions from research and development to technical sessions to practical sessions on evaluation. The conference is designed to address the interests of researchers, practitioners, managers, labor organizations and operators involved in all modes of transportation from around the world, and achieve a common understanding of current issues.

Conference Tracks

- A. Define and Measure Fatigue Problem
- B. Health-Related/Pharmacological Issues
- C. Enacting/Implementing Change
- D. Supporting Technologies
- E. Fatigue and Performance Modeling
- F. Evaluation of Fatigue Risk Management System Interventions

Registration Fees

US\$ 375	US\$ 475	US\$ 550	US\$ 175
