EVENTS and ANNOUNCEMENTS

Third International Conference on Rail-Human Factors - The 3rd International Conference on Rail-Human Factors will be held in Lille, France on 3-5 March 2009. Details about the conference can be found at <http://www.railhumanfactors.co.uk>.

The conference is organized by the European Railway Agency, Rail Safety and Standards board, Network Rail and University of Nottingham, in association with the Ergonomics Society, Société d'Ergonomie de Langue Française (SELF) and Rail Research UK.

As with the first two conferences in the series, this will be the forum for human factors practitioners and researchers to discuss their latest work. Rail industry and regulators will be able to describe their current use of ergonomics and human factors as well as identifying their future needs. There will also be a number of leading authorities as keynote and invited speakers, workshop sessions and the presentation of technical papers. A number of technical visits will be available to attendees.

Please register your interest in the conference as early as possible, with Stella.Okezie@rssb.co.uk. For information about submission of abstracts, please contact ECRHG@nottingham.ac.uk

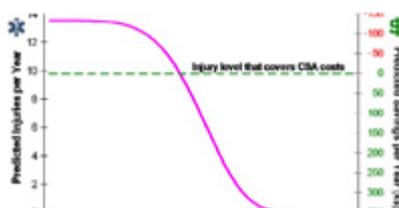

UPDATED HUMAN FACTORS WEB PAGE

The Human factors section of the Federal Railroad Administration's web site has incorporated a new functional interface to enable easy navigation to information on the teams current projects, completed project reports and results or papers. The Human Factors R&D Program Structure organization chart has been converted into a graphic user interface or portal through which all aspects of the Human Factors areas of research can be accessed by the click of a square. You explore the new structure by clicking this link: <http://www.fra.dot.gov/us/content/1910> or clicking on the "FRA HF Main Web Page" link in on the left hand side of this flyer.

LATEST UPLOAD

No new Human Factors-related reports or papers have been uploaded to the FRA web site since May's e-mail update. Continue to check this section in future flyers for the most recently uploaded research information.
