

FRA's Behavior-Based Safety Program

Project Description:

A safety risk reduction approach, including:

- Safety leadership training
- Peer-to-peer observations and feedback
- Continuous improvement
- Barrier identification and removal
- Corrective action plans and implementation

Railroad Impact:

At-risk behaviors cut by 2/3 over 17 months

- Improved safety-related communications
 - Peer-to-peer
 - Labor-to-management
- Improved personal awareness of safety
- Long term goals:
 - reduce HF accidents and injuries
 - Improve organizational safety culture
 - Stimulate industry adoption of innovative safety programs

FRA Task Monitor: Mike Coplen, RDV32

Cost & Schedule:

- FY08 – Continue implementation and evaluation of UP S. Region Pilot
- Pilot UP implementation expected to end in FY08.
