P001-1 If an access road is put on my property, it will be immediately outside our bedroom window, take a swath from the S end of our place, remove 10 fruit trees, wipe out an underground irrigation system, force me to move a gas line, take out our berries & grapes (on trellis) and limit my access from SE corner gate. That chunk of property (the access road) might be better placed on Prospect N of our place. I do not want to move, am too old to start over somewhere, have too many hours & \$ of sweat equity to calculate.

John A

P002-1

I would prefer the BNSF Alternative then the Allensworth. Because so close to property and I'm concerned about noise & vibration and aesthetics, very concerned.

Ramona C Valladares  
 ANGEL CASTRO PLEASE CONSIDER THE OTHER BNSF ROUTE.

Response to Submission P002 (Ramona Valladares, August 14, 2012)

---

**P002-1**

Refer to Standard Response FB-Response-GENERAL-10.

The Authority used the information in the Final EIR/EIS and input from the agencies and public to identify the Preferred Alternative. The decision included consideration of the project purpose, need, and objectives, as presented in Chapter 1, Project Purpose, Need, and Objectives; the objectives and criteria in the analysis of alternatives; and the comparative potential for environmental impacts. The Preferred Alternative has the least overall impact on the environment and local communities, the lowest cost, and the fewest constructability constraints of the project alternatives evaluated.
