Combined, railroad crossing and trespasser deaths have accounted for approximately 94% of all rail-related deaths over the past ten years.

About every 3 hours, a person or vehicle is hit by a train.

Crossings in the U.S.

- 54% active crossings (include gates, bells, and/or flashing lights)
- 46% passive crossings (include signs and markings, but do not include active warning devices)

In 2016 there were approximately 260 fatalities at railroad crossings, an increase of 20 from the previous year.

In 2016 there were approximately 480 trespasser fatalities at railroad tracks, an increase of 30 from the previous year.

Almost three-fourths of railroad crossing accidents occur in clear weather conditions.

830 Railroads

134,000 Miles of track

216,000 Railroad crossings

73% Trains cannot stop quickly! A train traveling at 55 MPH takes a mile or more to stop!
