

## Scott Gabree, US DOT – Volpe Center

Scott Gabree received his Ph.D. in Experimental Psychology from Northeastern University in 2009. Since that time, Scott has been working at the Volpe Center in Cambridge, MA. Scott has worked on a variety of rail-related projects at the Volpe Center including projects on grade crossing safety and an effort to mitigate the effects on train crews of exposure to potentially traumatic incidents. Recently, Scott's work has focused primarily on trespasser issues on the railroad right-of-way with a particular focus on intentional deaths.
