

7.9 Cultural Resources and Historic Properties – Errata Sheet

	Incorrect Tier 1 Draft EIS Text/Table		Tier 1 Final EIS Text/Table (Volume 2) Page
	Page	Description	
1.	7.9-6	The bullet identifying Pennsylvania as the state with the highest number of NHLs in the Affected Environment has been revised to include Pennsylvania and Connecticut.	7.9-6
2.	7.9-6	Text has been edited to include the Florence Griswold Museum in response to public comments.	7.9-6
3.	7.9-6	The bullet listing the NHLs for each Action Alternative reflects the addition of the Woodlands and College Hill Historic District for each Action Alternative and inclusion of the Fairmont Waterworks for Alternative 3.	7.9-6
4.	7.9-7	The revised number of NHL properties and NRHP-Listed properties in the existing NEC Affected Environment (AE) reflects the addition and deletion of properties that were further examined for mapping accuracy. Some properties originally identified in the AE were found to be immediately outside of the 1-mile-wide AE boundaries and were removed from this table. Other sites were found to be in the 1-mile-wide AE boundaries and were added to this table.	Table 7.9-2
5.	7.9-10	Text has been edited to clarify the types of resources that could be impacted by each construction type.	7.9-10
6.	7.9-11	The revised number of NHL properties and NRHP-Listed properties in the existing NEC Representative Route that defines the Environmental Consequences reflects the addition and deletion of properties that were further examined for mapping accuracy. Some properties originally identified in the Representative Route were found to be immediately outside of the 150-foot-wide boundaries and were removed from this table. Other sites were found to be in the 150-foot-wide boundaries and were added to this table.	Table 7.9-4
7.	7.9-12	The revised number of NHL properties and NRHP-Listed properties in the existing NEC Representative Route that defines the Environmental Consequences reflects the addition and deletion of properties that were further examined for mapping accuracy. Some properties originally identified in the Representative Route were found to be immediately outside of the 150-foot-wide boundaries and were removed from this table. Other sites were found to be in the 150-foot-wide boundaries and were added to this table. Note that only the Existing NEC column changed.	Table 7.9-5
8.	7.9-13	Text in Sections 7.9.4.2 and 7.9.4.3 updated to reflect correction of NHL properties.	7.9-13
9.	7.9-14	Text in Section 7.9.4.4 updated to reflect correction of NHL properties.	7.9-14
10.	7.9-15	Text in Section 7.9.4.4 updated to reflect correction of NHL properties.	7.9-15
